

KIMBERLY WYATT HOTFOOTS IT INTO HER NEW PROJECT

Whether performing on stage or rustling up something in the kitchen, singer and this year's *Celebrity MasterChef* winner Kimberly Wyatt is determined to take the lead when it comes to teaching 11-month-old daughter Willow to dance to her own beat.

"I want to create an incredible life for my family and to be an inspiration for Willow," she tells **HELLO!**.

"I've always been such an incredibly ambitious and determined woman. I love to make things happen, to challenge myself and try new things. But all that means nothing without coming home to the peace of my little family," she says of her life with husband Max Rogers and their little girl (both above).

She also tells of the perfect harmony within the family. "My husband is a film-maker, so when I feel like I really need to dance, we go to a place called Sunbeam Studios and just put on some music," she says. "He films, I dance, Willow runs around and it's great."

Making life even more miaow-vellous for the former Pussycat Doll is her new partnership with Sure Compressed antiperspirant.

"It's perfect for mums on the go," she tells us.

Throwing herself fully into the campaign (left) means Kimberly has no need to break into a sweat over her next project – mentoring young dancers for CBBC's *Taking the Next Step*.

"I can't wait to work with the kids on their crazy journey into dance. I'm working on lots of potential cooking things as well – cookbooks, blog, TV shows. My aim is really just to find ways to connect family, food and dance," she says.

• The smaller, smarter Sure Compressed is available nationwide and lasts as long as the big can.
